## JASMINE, THE CAT THAT GOT THE 'QUEEN'

Jasmine is a grand old Dame. She has reached the spectacular age of 21 (a whopping 100 in cat years) and has even received a letter of recognition from the Queen.

Jasmine's owner, after some deliberation on a Friday evening with Cootes Nurse Amanda and Manager Becky, decided that she would write to the Queen to tell Jasmine's story. Inspired by the age old tradition of humans receiving a card (telegram) from the Queen Mrs Scott put pen to paper and started writing.

Jasmine was adopted by Mrs Scott in 2007 and has been her faithful friend ever since. Jasmine has been looked after by Cootes Veterinary Clinic in Burgess Hill for many years. She has the common 'old age cat' problems of both kidney disease and an over active thyroid gland. Whilst many people would be unsure of what to do in these situations Jasmine's owner has always provided the best Veterinary treatment along with Ros Norledge, Jasmine's Vet at Cootes. Kidney Disease and over active Thyroid are both common in old age cats. They are both manageable with correct diagnoses and treatment. If you have any concerns regarding your cat or any other pet, Please feel free to call Cootes Veterinary Clinic on 01444 242434.

One of our very experienced team would be only too happy to help.

Ros and the team would like to pay tribute to Mrs Scott's true dedication and to Jasmine on her legendary birthday!

ROS AND THE TEAM WOULD LIKE TO PAY TRIBUTE TO MRS SCOTT'S TRUE DEDICATION AND TO JASMINE ON HER LEGENDARY BIRTHDAY!

### Come to Cootes – it's where your pets would choose to come!

Here at Cootes we have a team of **highly experienced vets and nurses** who will give the highest quality of care to your pets.
